

Analysis on ICO (initial-coin offering) project

Jixuan Li

October 15, 2017

- Total market size and total value of the crypto market (5 year line chart)

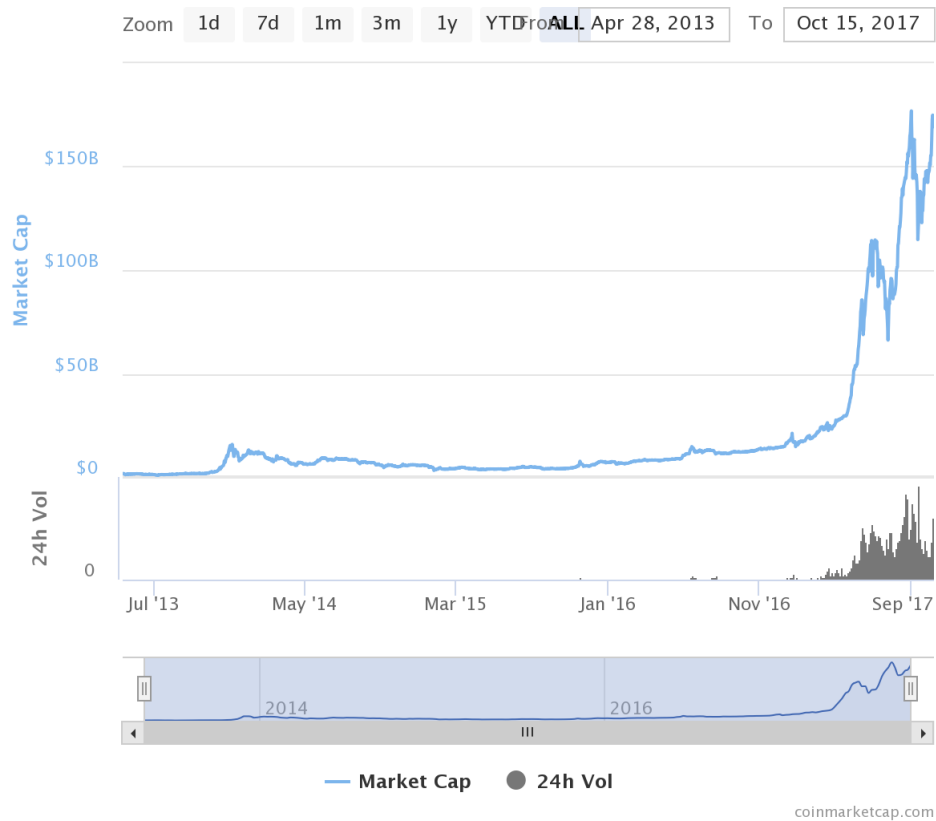

Figure 1: Total market size and total value of the crypto market (5 year line chart)

From figure 1, the total market capitalization starts to become popular in this year. Particularly, we could apparently notice that are two steady increases. One is from 24th April 2017 and the other one is from 16th July at the same year. The highest point reaches nearly \$180 billion. Overall, the total trend is fairly optimistic.

- Historical value and trend (time series) of the largest market cap cryptocurrencies

Bitcoin Charts

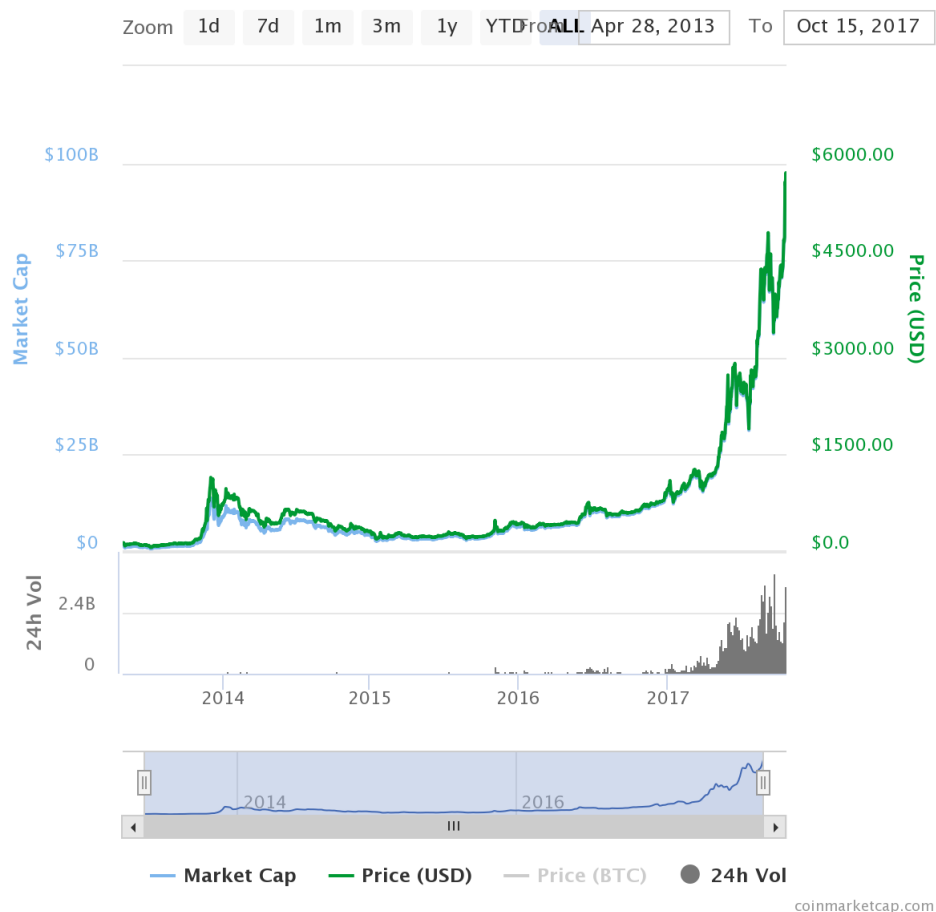

Figure 2: Historical value and trend of the largest market cap cryptocurrencies

The largest market cap is Bitcoin (BTC) and has the market value near \$100 billion, occupying nearly 60% of the global market. Furthermore, it matches the general trend of the global crypto market.
